

Boat Lock Procedure Review

This instruction has been made because in the last few months a few owners have gotten trapped on the lakeside due to the lock not relatching properly. Please take note of how to use the combination lock at our community's private lake access so this does not happen to anyone else.

To Open

1. Enter the code to unlock the lock. (The code must line up with the lines that are above the center mark of the dials)

To Relatch and Lock

1. The code must be maintained to relatch the lock. If the code gets scrambled before relatching, re-enter the code to latch the lock.
2. After the latch is closed, scramble the code to lock the lock.

The boat ramp code continues to remain the same since currently dues are still voluntary for now in 2023.

Please, always lock the lock behind you when on the lake.

Thank you,

Silver Springs Village Property Owners' Association
